

CO₂ Suppression Systems

DESCRIPTION

Cylinder Rack Assemblies are designed to rigidly support CO₂ cylinders on multiple or main/reserve cylinder applications.

Cylinder Rack Assemblies w/ weigh rail are available in 2,3,4,5 and 6 cylinder configurations. For applications with more than 6 cylinders, "Add-on" Cylinder Rack Assemblies are available in the same 2 through 6 cylinder configurations. This will allow any combination of cylinders to be housed in a single row rack arrangement.

All cylinders are mounted on 12" centers.

Maximum height of rack: 86"

See rack assembly dimensions on back page
